☎ 9095882791

PROFESSIONAL SUMMARY

Electrical and Electronics Engineering student with strong programming skills in C, Embedded C, and Data Structures, along with hands-on knowledge of circuit design, control systems, IoT, and automation. Interested in both software development and hardware-based engineering solutions with strong problem-solving ability.

EDUCATION

B.E. — Electrical and Electronics Engineering 2023 – 2027

Sri Ramakrishna Engineering College, Anna University | CGPA: 8.59

Higher Secondary 2022 – 2023

National Matric Higher Secondary School | Percentage: 91.8%

SKILLS

- **Programming:** C, Java basics, embedded C, DSA basics, SQL, OOPS basics.
- **Electrical & Electronics:** Circuit design, Control systems, Digital electronics.
- **Tools & Platforms:** Multisim, Ansys, Tinkercad, GitHub, MATLAB, Simulink, Simscape.
- **Soft skills:** Teamwork, Time management, Adaptability.

AREA OF INTEREST

- Embedded Systems, IoT & Automation.

PROJECTS

Smart Automatic Power Factor Correction Using IoT

- Designed and implemented a system to automatically monitor and correct power factor in real-time.
- Integrated IoT-based monitoring for remote observation and energy efficiency optimisation.
- Improved power quality and reduced energy losses in industrial setups.

Efficient Charging Infrastructure for EV

- Developed a wireless EV charging system using coils for efficient power transfer.
- Implemented a display to show real-time battery charge level during charging.
- Improved energy utilization and charging performance.

Solar Traffic Light Management System

- Built a breadboard prototype simulating a traffic light system using 3 LEDs powered by solar energy.
- Designed alternating LED circuitry to replicate real-world traffic signal timing using timer-based switching.
- Demonstrated energy-efficient, sustainable hardware design suitable for low-power traffic control applications.

INTERNSHIPS

Salzer Electronics Unit II

May 2025

- Gained hands-on experience in electrical control panels and automation systems.
- Assisted in testing and troubleshooting relay circuits and industrial wiring.
- Learned electrical safety practices and PLC basics.

Roots Industries Private Limited

Dec 2024 – Jan 2025

- Worked on the assembly and testing of automotive horns.
- Learned quality checks, fault diagnosis, and documentation of electrical components.
- Gained practical exposure to automotive electrical systems and manufacturing processes.

CERTIFICATIONS

- NPTEL — Introduction to IoT (Elite)
- NPTEL — Enclosure Design of Electronics Equipment (Elite + Gold)
- NPTEL — Smart Grid (Elite + Silver)
- NPTEL — Programming in C (Elite)
- HackerRank — C Basics and Intermediate
- eSim (IIT Bombay) — 82.1%
- Prompt Engineering for Everyone - IBMSkillsNetwork
- Wadhvani Foundation: Employability skills: Job Ready (With AI).
- EV Workshop
- Participated in several competitions in Paper and Project Presentation.

ACHIEVEMENTS

- Secured II Prize in Project Presentation organised by the Science Association.
- Secured III Prize in Reverse Engineering Challenge — The Schematic Recovery from PCB Boards.
- Secured Distinction in English Typewriting – Senior Grade.
- Smart India Hackathon Finalist (Inter-college).
- Selected for the final round of TANCAM (Tamil Nadu State-level Project Competition).
